Remote X Pro

The remote control was just a standard look and a limited function since its first development. Today's remote controller are universal. It can do it all in one place. With the demands of technology, vivid enhanced products are becoming more **Intrinsic** as expected. Newly designed remote control products are now being treated above the standard. Its has a sophisticated appeal with additional functions. It can paired along with other device products that has built-in features as Bluetooth, internet, WiFi and voice ready.

People are so quickly to love a new stimuli product including myself with the “*click and go*” method. The **habituation & chunking pattern** is the most custom next generation line of product to have. We strive for appeal, usage combability and the “tap & go” mechanism without a thought.

In an average Household, there's 3-4 remote control's just sitting around and all for the TV. An innovative idea is to have a remote control do, “All-In-One” is ideally. Until then, a feature was suggested to have a “*Search*” remote finder.

When the “Search” button is activated from your phone device it would do the following:

- The yellow bumper edge (reflector) would light up (*see next page color concept design*)
- Remote Control vibrates
- Creates a sound alert

Additional feature includes:

- Bluetooth ready - pairing devices
- Music / headphone enabling settings for soundbar / speakers
- Social Media ready
- App access ready

Over the years, traditional remote is mainly a black coloring device. Users had suggested using bold colors for better visibility, attractiveness and comfortability grip for holding.

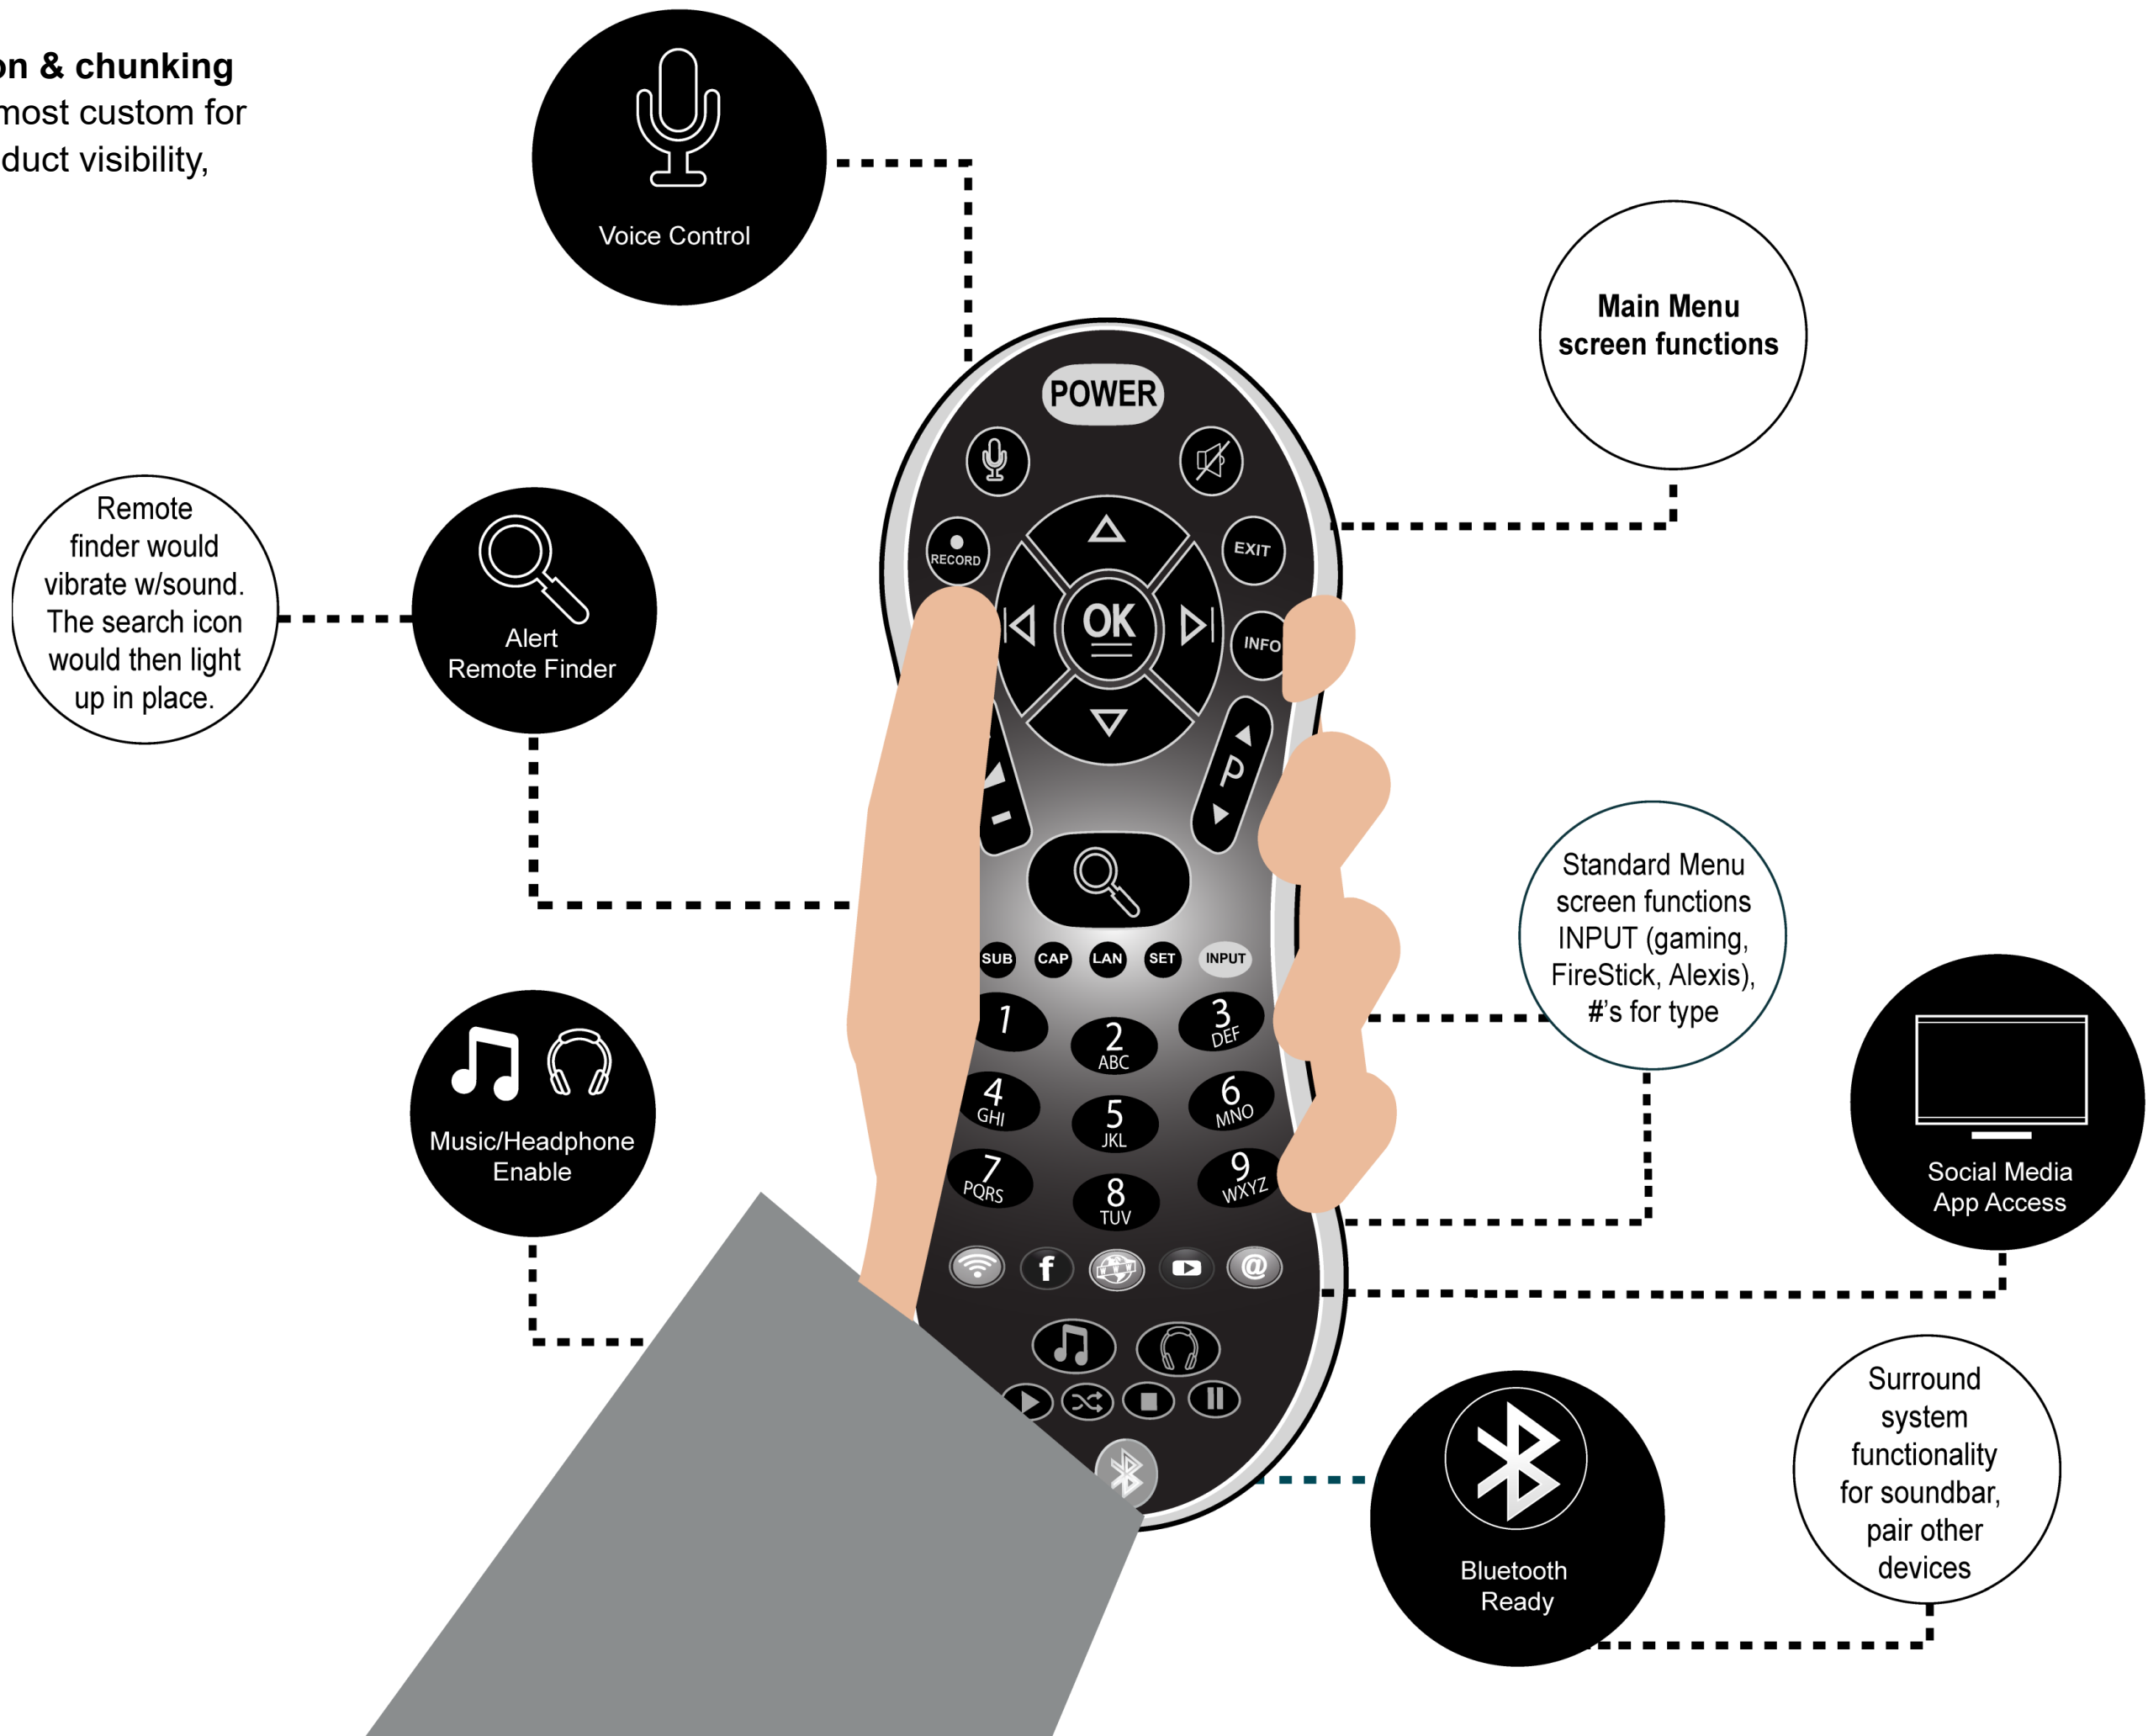

Remembering those days of trying to find that remote control that just blends in with the rest of the room and furniture.

Introducing racing bold color trims. The main components button carry's the coloring system for its main functionality. By enhancing the color trim edge, it gives the remote control a stylish edge, better grip and do it all-in-one controller.

This is a new beginning of opening up a new library palettes of colors to select from.

The **habituation & chunking pattern** is the most custom for design and product visibility,

Superman returned in 2006, but now seven years later, it feels like he is truly back in Man of Steel -- an exciting series reboot that pays homage to the past without becoming a slave to it, successfully paving the way for a new franchise with its solid script, strong cast, and next-level action.

Superman in the DC Extended Universe, starring in Man of Steel (2013), Batman v Superman: Dawn of Justice (2016), and Justice League (2017).
